**MAKER'S MAKE**  
Smart Furniture Solutions

Perfection In The Craft, Excellence In Design.

With over 15 years in the interior design industry, 3 Square Studio has built a reputation for excellence in high-end transformations since 2008. Our journey has been defined by a commitment to creating beautiful, functional spaces that reflect our clients' unique styles.

As we expanded our expertise with Makespace Design and Build, we enhanced our dedication to comprehensive design solutions. Now, we're excited to introduce our latest venture, Makers Make, where we blend experience with innovation in interior design.

At Makers Make, we invite you to share your vision with us. Our focus on craftsmanship and creativity ensures that every project captures your individuality. We specialize in modular furniture, workstations, storage solutions, and meeting rooms, offering tailored designs that meet your specific needs. Let us transform your space into an extraordinary experience that harmonizes style, functionality, and sustainability. Your dream space awaits.

MR. BONEE SHARMA  
(Founder)

At Makers Make, we take a conscious approach at every stage to deliver functionality in its most aesthetically refined form. Our team is dedicated to actively engaging with clients to understand and deliver bespoke modular furniture solutions. The artistic passion to create extraordinary spaces with detailed craftsmanship is reflected in the intricate sophistication of each project.

- Ergonomics

# Lounges

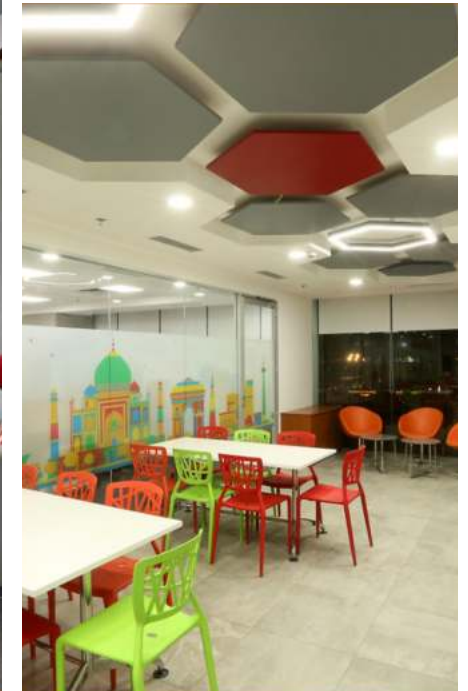

## Ceiling

Enhance your corporate space with ceilings that blend sophistication and acoustic functionality, setting the tone for a professional environment.

### ***Felder FD 29 Professional***

The Felder FD 29 Professional is a high-precision industrial drilling machine designed for woodworking, ideal for creating rows of holes efficiently. It features multiple spindles for simultaneous drilling, adjustable depth and angles, and a sturdy metal build for durability. With user-friendly controls and safety mechanisms, it's perfect for professional workshops focused on accurate and efficient production, like Makers Make, where precision in craftsmanship is key.

## ***OptiEdge High-Speed Auto Edge Bander***

At Makers Make, we utilize the OptiEdge 6.5P High-Speed Auto Edge Bander to ensure flawless edge finishing on our modular furniture. This machine allows us to apply edging materials, such as PVC, ABS, and wood veneer, to panel edges with precision and efficiency. Its high-speed automation reduces manual work while providing consistently clean and durable edges. With advanced controls and fine-tuned accuracy, this edge bander helps us maintain the highest standards of quality, delivering professional-grade finishes on all our bespoke furniture pieces.

## *Panel Saw*

At Makers Make, we utilize the J-3200.IN Pro Panel Saw to achieve precise and efficient cutting for all our modular furniture projects. This advanced machine allows us to work with large panels of wood, MDF, and plywood, ensuring accuracy and consistency in every cut. With its smooth sliding table mechanism and user-friendly controls, we can effortlessly handle complex cuts while maintaining safety and precision. This tool plays a crucial role in our production process, enabling us to deliver high-quality, bespoke furniture solutions with intricate craftsmanship.

## ***Cold Press***

At Makers Make, we rely on the Cold Press J-120T1 Single Layer to streamline the production of high-quality laminated panels. This powerful machine uses heat and pressure to bond various materials such as wood veneers, laminates, and particle boards, ensuring a smooth and durable finish. With its single-layer pressing capability, it allows us to efficiently handle large-scale furniture production while maintaining precision and consistency. This hot press is an essential part of our process, enabling us to deliver bespoke modular furniture solutions with superior craftsmanship and long-lasting quality.

## *Edge Bander*

The curvilinear edge bander is a specialized machine designed for applying edge banding on curved or irregularly shaped panels, commonly used in furniture and cabinetry production. It ensures precise and efficient application of materials like PVC, wood veneer, or melamine, providing a smooth, finished look to non-linear edges. With features like precision controls, automatic feeding, and foot pedal operation, it enhances workflow while allowing for hands-free control. Compact yet highly functional, this machine is perfect for workshops like Makers Make, where attention to detail and craftsmanship in custom furniture are key priorities.
